Summary

A versatile T-Clip holder for scissors, pliers, and similar tools, designed for IKEA SKÅDIS pegboards.

I designed this holder primarily for scissors, but its versatile shape also allows it to accommodate pliers and other tools with similar dimensions.

The holder uses the **T-Clip mounting system** to attach to an IKEA SKÅDIS pegboard.

Support-free rear pegs: The rear pegs are designed to print without supports and help prevent undesired movement when mounted on the pegboard.

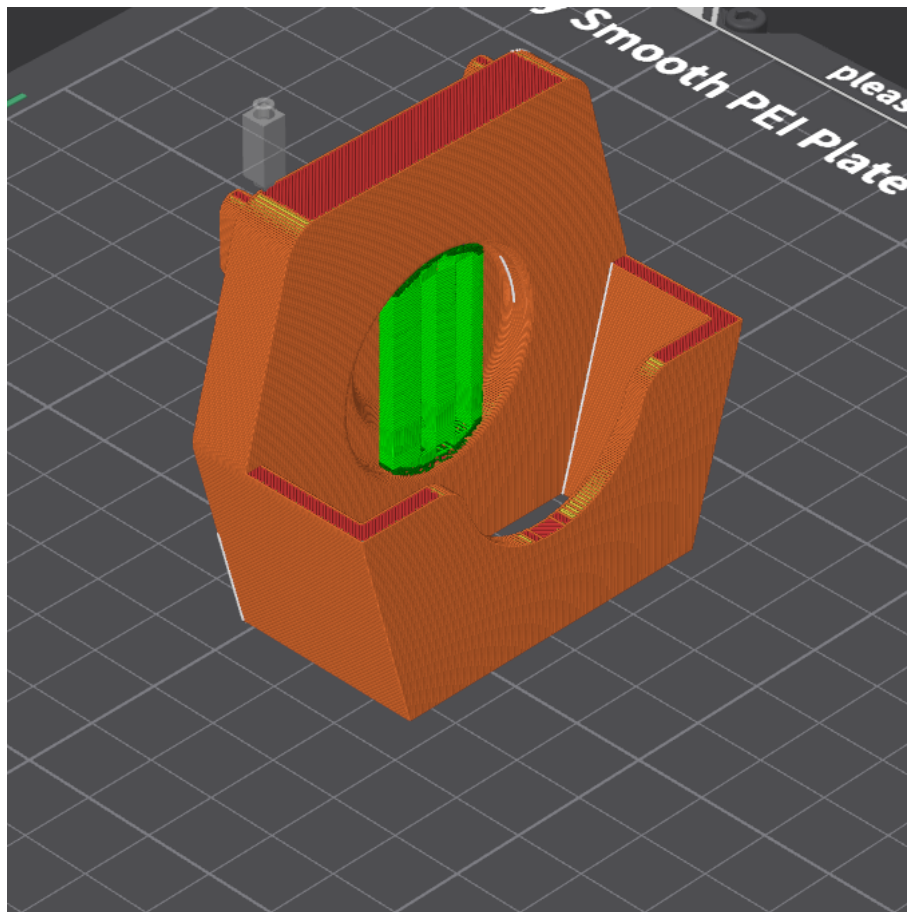

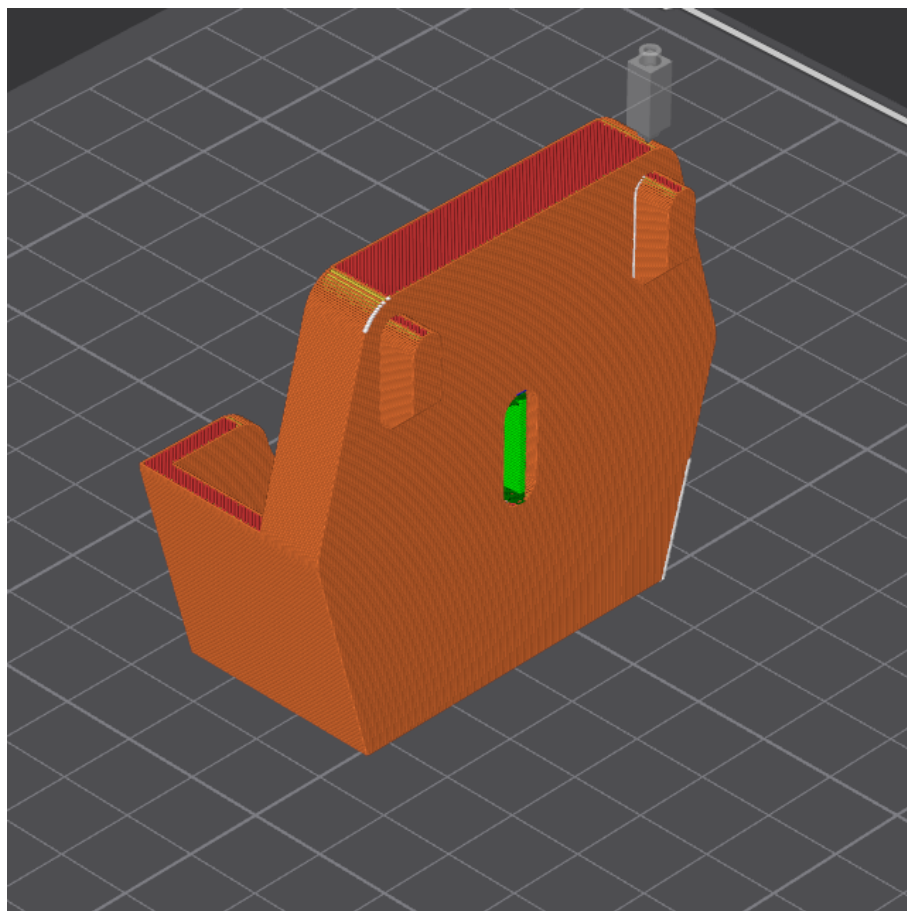

Note: Tool compatibility depends on the dimensions and shape of each item.

Print Orientation and Parameters

The model should be printed upright. Supports are only required inside the T-Clip mounting system, while the rear pegs can be printed without supports.

I printed my holder using **4 wall loops** and **10% gyroid infill**.

I recommend printing this model in **PETG** for improved durability and resistance to wear.
