updated 21. 10. 2026 | published 21. 10. 2026

Summary

All the models needed to print your own wings in the color you want

[Sports & Outdoor](#) > [Outdoor Sports](#)

Tags: [duck](#) [hunting](#) [duckdecoy](#)

Items you will need are;

Glue

8mm magnet

Something to tap with like small hammer

I printed the wings with minimal walls and shells with infill of 5% to keep weight down.

I printed the connector with an extra wall or two to make it stronger but with minimal infill.

The connector may be too loose for your taste, you can increase the diameter of the drive shaft with a little electrical tape. The magnet will increase the drag. So adjust to your liking.

All printed in petg

Have fun and be creative.
