Summary

Printable handle for wiper blade and street sweeper bristle lockpicks

Hobby & Makers > Tools

Tags: lockpick locksport locksmith

A handle to enable the use of a Street Sweeper Bristle or Windshield Wiper Spring as a lockpick without undue discomfort. This helped me reduce some of the weight and bulk from my more heavily carried kit by allowing me to carry a single handle and a bunch of interchangeable picks.

Do NOT use Supports!
(if they are on "Auto" change it)

Mine is printed from Prusament Carbon Fiber PolyCarbonate because I like the look of the CF filled PC and I wanted the handle made from PC so it would last repeatedly being sat on... (it lives in my back pocket)

While this fits my picks perfectly, since it will be printed on a different printer, it may need to be scaled up or down by a few % to better fit your lockpicks and other tools.

Mine measures:
89.8mm long

11.8mm wide
4.1mm thick
Insert maximum thickness 0.8mm (0.320")
Insert maximum width 2.9mm (0.114")
This fits the two narrower tension wrenches found in most sets, but not the widest of them.
