Extra large receptacle cover for smaller 1 gang US 220 round outlet.

Fits with standard 1 gang 1.406 in. Hole Single Outlet/Receptacle

I needed to cover an extra large hole in a back splash and making a custom plate seemed like the cleanest option.

I added "GFCI" in the slicer for my use with a modifier, not included in the .stl model but it is in the .3mf with a blank version as well.

Print face down with whatever material and settings you like.

No support.

P.S. New to CAD just wanted to share what I made. Fell free to fix any flaws.
