Summary

A cute little pegboard attachment that saves space while making your setup look amazing, enjoy!

[Art & Design](#) > [Wall-mounted](#)

This model uses roughly 57 grams of filament and takes around 2 hours and 8 minutes to print, making it a fairly quick print for a useful little addition to your setup.

The plant pot holder is designed to fit the IKEA SKÅDIS pegboard and currently fits a 6.8 cm plant pot. I chose this size as I thought it would work well with common household plant pots while keeping the holder compact and saving space on your pegboard.

If you'd prefer a different size, feel free to leave a comment with your desired pot diameter, and I'll take it on board as soon as I get the time. I'd love to hear your suggestions!
