Summary

A small surface mounted box for ur shelly and switch, including a clamp for in and outgoing cables.

Household > Other House Equipment

Tags: lightswitch switches shelly aufputz taster

This is just a small surface mount box. I made it since I needed a way to mount my shelly2pm and the shelly switch for a motor driven shutter.
The cables can be clamped down to get some stress releave and secure them.
Electrical work is dangerous, please do not work on it if u do not have the needed knowledge and equipment!
Needed:
3x M3 Heatinsert
5x M3 10mm Countersunk

For fixing the switch u can use a small screaw or an M3. I made the hole a little bit smaller for variing oprions.
