Summary

I made this sign for my front yard here in Texas for all the TalaFREAKOs out there.

[Household](#) > [Outdoor & Garden](#)

Tags: [sign](#) [texas](#) [yard](#) [unitedstates](#) [senate](#) [talarico](#)
[talafreako](#)

I made this sign for my front yard and wanted to make sure to make it available for anyone else that wants to print it. The sign is meant to be printed and then hung via the 2 holes at the top... I have a frame from a previous political candidate that I'm going to use to place it in my front yard with zip ties to attach it but it should be able to hang from anything.

Side 1 - "I 3D PRINTED THIS SIGN TO TELL YOU TO VOTE TALARICO"

Side 2 - "TALAFREAKOS for TEXAS"

Make it double sided by hanging them opposite to each other or use the same side twice so people can see it both directions going down your street.

I've included pre-configured 3MF files for the Snapmaker U1 and Prusa MK4S with MMU3 as well as the raw STL files which should be able to scale up for any sized printer. I suggest printing it in PETG if you're in Texas just

in case Second Summer decides to pick up again towards the end of October.

I set the license to Non-commercial but feel free to print these for your friends or charge for materials only. If they want to make a donation to the Talarico campaign that's cool too just don't sell it on Etsy for a profit please. Gracias.

Shout out to all the Talafreakos out there.
