Tags: [parametric](#) [door](#) [decor](#) [shoe](#) [doorstop](#) [openscad](#) [wedge](#) [supportfree](#) [highheel](#)

A stylized high heel shoe that works as a sturdy door wedge. It has a solid heel block for durability, a low 4 mm toe tip that slides cleanly under doors, and a hollow foot cavity with a parametric internal bridging angle so it prints with no supports and no holes in the bottom.

- 180 × 57 × 95 mm
- 5 mm walls, 30° internal overhang angle

Customize it in your browser

This model is fully parametric. Change length, width, height, wall thickness and the overhang angle. Open it in the free OpenSCAD Playground, change the numbers and export your own STL: [Open it in OpenSCAD Playground](#)
