A trapezoidal cradle that mounts the rear camera of a WOLFBX G840S dashcam (or a similar rear camera) on the inside of a car or truck, against the glass, instead of on the outside. It has a front cutout for the lens, a support floor, triangular side gussets, and wide adhesive wings plus a lower extension for VHB double-sided tape.

- Fits a 40 mm (front) / 50 mm (back) × 35 mm deep × 32 mm tall camera
- Overall 102 × 35 × 55 mm, 3 mm walls

Customize it in your browser

This model is fully parametric. Change the camera dimensions, wall thickness and tape wing sizes to fit another camera. Open it in the free

OpenSCAD Playground, change the numbers and export your own STL:
