[zip](#) [splitter](#) [y](#) [corrugated](#)

Y-splitter for corrugated cable loom. Lets a cable branch off the main loom through a side port.

Clamps around already installed loom, no need to re-thread cables.

Held together with zip ties, channels on the outside keep them in place.

Internal ribs fit into the corrugation so it doesn't slide.

Commercial use (selling prints or files) requires a separate license – contact me.
