Build your own modular shelving system!

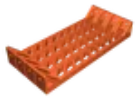

Turn simple wooden boards into a practical, customizable shelving unit with these **3D-printable modular shelf brackets**. Designed for makers, workshops, garages, desks, and home organization, this system lets you create shelves that fit your space and storage needs.

Key Features

- **Modular Design** – Build a shelf setup that suits your space.
- **Stackable System** – Expand vertically by adding more shelf levels.
- **Geometric Structure** – Open lattice design combines a distinctive look with efficient material use.
- **Easy to Customize** – Pair the brackets with wooden boards of your preferred dimensions.

- **Versatile Applications** – Great for filament storage, tools, organizers, hobby supplies, and everyday items.
