Tags: toy halloween desk robot decor figure spider fidget articulated flexi printinplace poseable creepy mecha cyberpunk arachnid

This articulated mecha spider has eight jointed legs that bend and pose, so it can crawl, curl up, or sit in a threatening stance. The body is covered in engraved panel lines, with a cluster of circular eyes on the head that give it a robotic look. It prints in place with the joints already moving, so it comes off the bed ready to play with or display.
Printed in black matte and drybrushed with silver acrylic paint to define the details a bit. If you go big, it will show much more of its design.
