Summary

A media basket with lid for your aquarium filtration system. SCAD is completely parametric for any size.

Tags: aquarium marine reef carbon

I used claude code to make a Media Basket for my Innovative Marine NUVO Fusion 25 Lagoon aquarium. It fits int he IM "Custom Caddy" to hold carbon/gfo/whatever. I tried using mesh bags but it was a pain to load/ unload.

Its completely parametric so you can make the container any size you want.

Great to hold any aquarium media in a down flow situation.

Model files

carbon_cartridge.stl

50x60x50 basket with fine mesh on top and botton. Fits IM Custom Caddy.
