Summary

I made this case to hold everything so you can program and test all at the same time.

Tags: arduino breadboard lcdscreen coralboard 3dptint

I made this to win the competition but I also made it for after I win so I can play with my coral boards and hook up my monitor i've been trying to hook up an LCD screen and make it a smart screen for a while and I need Raspberry Pi but this could work perfect with a coral board.
