Another version of Gunner's Revolver from Deep Rock Galactic, since you guys seemed to enjoy the last one so much! This time, I decided to adapt the season 6 skin Diesel Driven. The print came out really well! It is a little bit on the bigger side, but this is the canon size from in-game. I might recommend printing it at like 90% scale considering how massive mine turned out. I have a GIF below demonstrating how to assemble the weapon. Be careful during assembly! A couple parts may require some light use of a mallet. Superglue may also be necessary for a couple parts. Other than that, only a 3D printer is required.

Please feel free to contact me if you have any questions! I was able to assemble the whole thing without any major difficulties, but I am very happy to help anyone who needs it.
