Meet my new Colorful Articulated Lizard!

This little guy features a **fully articulated body, flexible tail, and movable legs**, making it super fun to wiggle, pose, and play with!

The colorful purple, green, and black pattern was created using **KOGI LAB**, my new browser-based 3D model coloring tool!

Features

- Cute, detailed articulated lizard
- Fully articulated, flexible body
- Movable legs and feet
- Flexible segmented tail
- **Print-in-place design**
- **No assembly or gluing required**
- Multicolor pattern created with KOGI LAB
- Great as a fidget, desk companion, or gift

Colored with KOGI LAB!

This lizard was colored using KOGI LAB!

KOGI LAB is a browser-based tool that lets you turn plain 3D models into colorful, patterned creations without manually painting individual triangles in your slicer.

Upload → Customize → Export!

- Upload your STL, OBJ, or 3MF model.
- Choose from 50+ patterns or create your own color combinations.
- Preview your design directly in the browser.
- Export a multicolor 3MF for your favorite slicer.

Want to give this lizard a completely different look? Try creating your own pattern!

Recommended Print Settings

- **Layer Height:** 0.15 mm
- **Infill:** 10–15%
- **Walls:** 2
- **Material:** PLA recommended
- **Nozzle:** 0.4 mm
- **Nozzle Temperature:** 210–220°C
- **Bed Temperature:** 55–60°C

Print-in-Place — No Assembly!

The lizard's articulated body is designed to **print in place**, with all moving sections already connected.

No separate parts, no assembly, and no gluing required!

Once the print has cooled, carefully free up the joints, and your colorful little lizard is ready to wiggle!

I'd love to see your prints! Share your makes and experiment with different colors and patterns using KOGI LAB.

Happy printing!
