Keep your airbrushes organized, secure, and always within reach with this adjustable dual airbrush stand.

An evolution of my original Airbrush Stand, this upgraded version combines two individual airbrush holders into one compact and functional workstation.

Featuring adjustable tilt angles, a stable geometric base, and a distinctive mechanical design, it's a practical addition to any airbrushing setup.

Key Features

- **Dual Airbrush Support** – Conveniently holds two airbrushes side by side.

- **Adjustable Tilt Angle** – Easily adjust the resting angle using the side screws.
- **Stable Open-Frame Base** – Lightweight construction with a wide footprint for stability.
- **Modular Construction** – Simple assembly using separate printed components.
- **Compact Design** – Keeps your workspace clean and organized.
- **Modern Industrial Style** – Functional geometry with distinctive mechanical details.

Parts & Assembly

The stand consists of four main components and two screws:

- 1× Base
- 2× Airbrush Holder
- 1× Connecting Bar
- 2× Adjustment Screw

The two airbrush holders are connected by the central bar, creating a unified adjustable stand.

Printing Recommendations

For the best possible surface finish, **I strongly recommend printing each airbrush holder separately on the build plate.**

This provides better print quality, cleaner surfaces, and a more attractive finished appearance.

For a premium look, try a dark matte or textured filament combined with contrasting colors for the adjustment screws.

Perfect For

Miniature painting, scale modeling, airbrush workstations, hobby workshops, and anyone who regularly works with two airbrushes.
