Summary

Adapter to mount the Phone on a 1/4" - 20 UNC thread

I designed a tripod holder with a lock lever to prevent the phone from falling down.

to mount the lever I used a DIN 7984 - M3 x 12 screw that is I directly screw into the plastic without a modelled thread, which worked well in my case.

I used PLA without support and brim for the Mainframe.

Additionally you find a dummy model of the Google Pixel 7 Pro which I modelled for the construction too.
