Add a classic festive touch to your Christmas tree with this elegant 3D printable ornament. The design features a detailed evergreen branch with decorative berries, surrounded by stars and snow-like dots on a rich red background with a white border.

The round shape and raised details create a beautiful layered effect, while the contrasting red and white colors give it a traditional Christmas look. A built-in hanging loop makes it easy to display on your Christmas tree, wreath, or holiday decorations.

Perfect for Christmas decorating, handmade holiday gifts, or creating a matching collection of festive ornaments. Print it in different filament colors to customize the design to your own holiday style.
