Model Info

A friction-fit model for standard carbonation caps. It was designed using [this version](#), but the versions that I have seen are all the exact same size.

Print Recommendations:

- 0.20 mm layer height (balanced profile)
- 0.4 mm nozzle
- 25 % infill
- No supports

If you have an older printer or use less precise settings, you may want to scale the model to 101% before printing, as it is extremely well fitted.
