I designed this piggy bank with a few small details to give it a more playful and unique look.

The pig has a curly tail, little feet, and an apple in its mouth. I wanted to create something that works as a classic piggy bank but also looks nice as a decoration.

The inside is hollow, providing space to collect coins. At the bottom, I added a screw-on lid so you can easily take out your savings without having to break the pig.

Features:

- Curly tail and an apple in its mouth
- Small details on the body and feet
- Hollow inside for storing coins
- Screw-on lid at the bottom for easy access
- A decorative design that also makes a nice gift

I created this model in Fusion and designed it for 3D printing.

I hope you enjoy printing it! Feel free to share your makes or leave some feedback :)
