Summary

I wanted to use a buffer tube stock, but I only have TinkerCad.

Toys & Games > Outdoor Toys

This has not been tested, and is my first upload on Printables :) I plan to test print eventually, and make sure the stock locks into place as intended.

I wanted to use a buffer tube stock, but I only have TinkerCad. I merged these two designs, and changed the threaded cap to a female threaded end to clamp the pieces together.

This matches the same spring geometry of the RAVION, it's not an extended tube so it should fit the same on a bed. This was using the standard trigger pull with the pivot sear.

Supports are still required, and use the same print settings as the original Ontos/RAVION
