[remixed](#) [th8s](#)

Created as a remix for Thrustmaster TH8S Gear Shifter to feel like an AR grip with room to rest your palm. The palm rest is pre-affixed, and the base is ready to accept the adapter for the shifter. No specific filament suggestions to print, but smaller layer lines will provide a smoother grip. Larger layer lines will create a texture to reduce slippage when gaming.

This remix is based on

AR sniper pistol grip
