Tags: guitar reverend

this is a router template for the reverend double agent W. it is made to used with a router bit like this (https://www.google.com/aclk?sa=L&ai=DChsSEwjNidrw_dqXAxVEbX8AHSreEHoYACICCAEQBxoCb2E&co=1&ase=2&g
mCmc9S1R0n7xoCH6gQAvD_BwE&ei=WQLhasXkB_KFwbkP-ticwA0&cid=CAAS3QHkales1-umeLJxWSxvQL-tAuDoBMuUX7iGMl5cdzdAxppHfRagDjggxKPdnKFr36P_TRJW0_CucF5dq1rmeRYCeM7B45
I would also use a straight wall guided bit first then the 45 to prevent chip out. you can use double sided tape to attach the pick guard to the template. sand the side wall if necessary as any bumps in the side will be on the pick guard. the screws are close to right but not perfect so you may want to skip drilling and use the original as a template for that. also part of the pick guard doesn't have the 45 degree bevel.

The cream is the replacement.
