A large and a smaller ghost for halloween. Both made for a small LED candlelight. (DONT USE REAL CANDLES!!!) ;) The small is 5,2 cm tall and the large is 7,1 cm tall. The small one can be printed without support, but you get the best results if you use it. The large model needs support.
If you use a 0.4 mm nozzle, 2 walls are perfect for the light penetration, and thats whats used in the photos!
