Summary

I designed this cable holder to keep the power cord neatly wrapped and organized

[Household](#) > [Other House Equipment](#)

Tired of having your vacuum cleaner's power cord lying around?

I designed this practical 3D-printable cable holder to keep the power cord neatly wrapped and organized when the vacuum cleaner is not in use.

The design features two hooks that allow the cable to be wound around them, keeping it tidy and easy to access.

Features:

- Compact and practical design.
- Two hooks for convenient cable storage.
- Helps prevent tangled cables.
- Easy access to the power cord.
- Simple design suitable for FDM 3D printing.

Please note: Check the dimensions and compatibility with your vacuum cleaner before printing. I made for Kärcher WD2

I hope you find this design useful! If you print it, feel free to share your results.
