A custom-designed 3D-printable riser/stand system specifically made for the **LG NS40T Soundbar**.

This stand elevates your soundbar off the desk or TV console to improve audio projection, give clearance for cables, or create space underneath. Designed with rear and side lips to keep the soundbar securely in place without sliding.

## Features

- **Perfect Fit:** Tailored specifically for the profile of the LG NS40T.
- **Modular / Sectioned:** Split into matching sections so it prints cleanly and easily on standard build plates.
- **Lip Edge:** Integrated retention edge along the back/sides prevents the soundbar from shifting.

- **Clean & Sturdy:** Sturdy geometry designed for strength and low resonance.

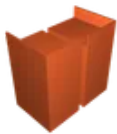

## Recommended Print Settings

- **Material:** PLA or PETG
- **Layer Height:** 0.20 mm
- **Infill:** 15% – 20% (Gyroid recommended for strength and vibration dampening)
- **Walls / Perimeters:** 3 or 4 (for solid side supports)
- **Supports:** No supports needed (orient flat on the bed)

## Tips

- For extra grip and vibration absorption, add small self-adhesive rubber feet or EVA foam pads to the bottom and the top resting surface.
