Summary

Use your Xbox Series X/S controller with just your left hand.

Gadgets > Video Games

https://www.youtube.com/watch?v=23ihGmVhKwQ

Printer: Bambu P1S

Filament: Pla Pro or Plus for RB and RT levers (Elegoo PLA+ works really well).

PETG for all other parts (I've found that Polymaker's Polylite PETG gives significantly better results than any other PETG I've tried).

***IMPORTANT: Make sure to calibrate your PETG flow rate before printing. The tolerances between the parts are very small and failing to calibrate your PETG beforehand may result in some parts being unable to fit together.

Wall Loops - 4 for all parts.

Sparse Infill Density - 40% Gyroid for all parts.

Auto generated tree supports for all parts that need supports.
