Summary

Wanted low profile and solid car shelf. I have designed this to a bracket that i have purchased on amazon.

[Hobby & Makers](#) > [RC & Robotics](#)

I wanted nice looking low profile shelf for my rc collection so i have designed this around a bracket that i purchased from amazon.

I ordered this 6" bracket: <https://a.co/d/03Yfjlo8>

And M4x16mm screws from aliexpress: https://a.aliexpress.com/_mKA7gCr

And you will also need some M4 nuts

After that just put all together and it looks great and solid!
