Summary

A hanging bracket meant to support a separate coffee station organizer for my 4 portafilter baskets, tamper and scoop

I made this design as part of a larger organizer for my coffee station setup. This model is only for the hanger that attaches to the cabinet above my coffee area and has screws on the bottom so I could attach my wooden shelf on to this hanger/bracket. The design is inspired by the shape of Torii gates. The last image shows a render of the bracket on its own so you can see what's going on under the shelf. It's specifically shaped so that it fits between all of the holes in the shelf.

Side note about the wooden shelf: It's maple wood that I dyed with vinegar that had been steeped with steel wool. The process was very finicky to get the right color.
