This is a wearable top hat. It was designed to be printed on a 256x256mm or bigger build plate. This hat will most likely also need some post print processing to fit, since everyone's head is different.

In the hat that's pictured, a heat gun was carefully used to soften the plastic. Then it was formed into place on the head while it cooled. The brim and flat top were also heated and bent to the desired shape.
