Summary

Visor for light switch to avoid accidentally triggering motion sensor

[Household](#) > [Other House Equipment](#)

Tags: [light](#) [motionsensor](#) [switchcover](#)

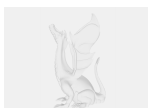

I have a light motion sensor that kept triggering while I walked down the adjacent hallway. Created this model to add a visor to the motion sensor to avoid triggering from the side.

Attached the associated .scad file so you can adjust the model for your specific light switch dimensions as well as visor length and angle.
