[dicerollingtray](#)

A big square dice rolling tray with raised walls and corner posts — roll in the tray and your dice stay off the floor and out from under the sofa. Sized for standard and oversized dice sets, card-game tokens, and board-game pieces.

****Print details****

Designed for support-free FDM printing. Slicer-validated (OrcaSlicer, 0.4 nozzle, 0.2 layer, PLA) — community printing in progress: be one of the first to print it and share your make!

180 × 180 × 43 mm — a generous rolling area with walls high enough to keep enthusiastic rolls in play

The honest numbers: ~188.3 g PLA · ~21 h 52 min on a Bambu A1 (0.2 mm, 20% infill). This is a big, solid tray — plan it as an overnight/weekend print, or scale it down in your slicer for a smaller, faster tray

PLA or PETG; prints flat as oriented, no brim needed on a clean bed

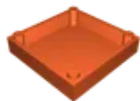

Watertight/manifold mesh — slices clean in OrcaSlicer, Bambu Studio, PrusaSlicer, Cura

Listing images are renders of the actual model geometry, not photos of a print — your Makes will be the first real photos

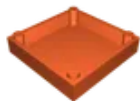

****Original design**** — modelled from code, all rights reserved. More free DeskForge models: the Desk Cable Clip, the Modern Ribbed Planter Pot with Saucer, and the Stackable Storage Box with Lid are all free on my profile — every one of them support-free.

****License:**** CC BY-NC 4.0 — free for personal use: print as many as you like for yourself and as gifts. No selling of prints, and no redistribution or sharing of the files.
