A three-compartment desk tray with a tall gothic-house backboard and seven separate window inserts. Store keys, clips and other small everyday items beneath the sculpted house facade.

Dimensions and storage layout can also be adjusted on the model page:

<https://boxesmodel.com/models/halloween-gothic-house-tray>

Overall dimensions, tray height, compartment count, main-bay proportion in the three-bay layout, wall/base thickness and foot clearance can be adjusted.

The files here are the complete fixed default-size version. Custom exports follow the pricing shown on the model page.

DEFAULT SIZE AND ASSEMBLY

218 x 140 x 164 mm overall. Tray base: 3.2 mm; nominal backboard-foot clearance: 0.25 mm. The rounded compartment corners reduce the rectangular footprint.

Nine printed pieces: tray, backboard, attic_window and window_1 through window_6. Fit the seven windows from behind the backboard with their flanges against it, using a small amount of model glue suitable for your filament. Insert both backboard feet vertically into the tray blind slots until the shoulders seat. Lift straight up to remove the backboard. Glue is an additional material; no screws are required. Review each piece separately for print orientation and supports.

Dimensions are in millimetres. Each STEP is an alternative CAD format for the matching STL, not an extra piece to print.

PRINT STATUS AND COLORS

Geometry, dimensions and part completeness were checked in CAD. This model has not been sliced or physically test-printed. Review orientation, supports and tolerances in your slicer. No tested print profile, print time or G-code is supplied.

The cover is a render of the actual model, not a photograph. STL and STEP contain uncolored geometry; illustrated colors require painting or slicer coloring. No AMS/MMU-ready multicolor 3MF is included. Food-contact performance has not been validated; use wrapped sweets if storing treats.
