Introducing an excellent Sidetrack remix designed by @Avinashshank_1450204 to use round metric tube for the plunger tube! This makes the blaster much more accessible with minimal changes in hardware.

To build this version of the Sidetrack you will need this alternate hardware:

- 55mm length of 32mm OD, 30mm ID aluminum tube
- 2x O-Rings, 30mm OD, 26mm ID

All other hardware is the same as the original Sidetrack!

For printing and assembly, follow the same instructions from the original Sidetrack.

This remix replaces the PrimeBar, Sear, Breech, PlungerHead, FrameLeft, FrameRight, and Grip.

For more information about the Sidetrack, follow this link:

Thanks again to ASH for the excellent work!

This remix is based on

SIDETRACK - Hammer Prime Revolver Blaster
