Tags: coralboard

Hi!

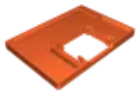

This is my submission for the Coralboard contest!

The purpose of my model is to simply allow for easy use of a breadboard with the Coralboard.

To print, use autorotate and auto arrange to make sure that everything prints properly, then pop all of the clips into it and pop in your Coralboard and off you go! Theres space to keep some extra things on the sides of the Coralboard

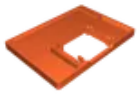

Sorry there aren't any real pictures right now, I'll put some up when I've finished printing it out!
