## Summary

A fart box/ present box.

Toys & Games > Other Toys & Games

Tags: box giftbox fart freetosell

This is a gift box that makes a horrible farting noise when you put the lid on or off. You can you use it for presents, or even just a harmless prank! It may only work with specific filaments. I don't really know though. I used gold PLA. This is free to sell, and thank you for supporting me! (Also I'm trying a new thing for the model covers. Tell me what you guys think about it in the comments!)
