Summary

Lidded boxes to replace the paper bag and to hold the Prophecy cards and player guide cards in the board game Almighty.

Toys & Games > Board Games

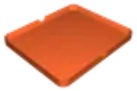

The Kickstarter funded boardgame "Almighty ⚡ The Godliest God Game" comes with a paper bag for its tokens. I created some lidded boxes that go in the well where the paper bag was, along with a box for the Prophecy cards and the player guides that otherwise would have no home. It fits sleeved cards (from Giochix.it).

Gobgu approves!

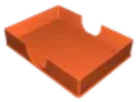

Some of the boxes have text or symbols. In Orca and its variants you can right-click on those parts and select Split -> To Parts. That will make it easy to assign color to the text and symbols in the objects browser if you have a multicolor printer.

I have set top and bottom layers for the lids to 0 and selected honeycomb infill.
