Summary

Rail adapter to replace the bipod on an A&K M249. Works on both the featherweight and the full metal version

I really wanted to put on a different bipod on my airsoft M249, but I didn't like the options available. As a result, I have created this remix! This variation of bipod rail adapter is beneficial in that it attaches to the metal bipod mount already on the M249, as well as having more rigidity with the screws.

I printed this in Tough PLA, with it angled (about 45 degrees, with the ring and thicker part of the rail touching the print plate) to increase strength. I recommend printing this with a brim, and up to you if you want to use supports (I didn't need any).

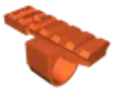

This remix is based on

G&P M249 Rail Bipod Adapter
