This **Modular Desk Clock** combines a clean, modern aesthetic with a playful, customizable design. Its distinctive face is made up of multiple interchangeable components that can be rearranged to create different patterns, color combinations, and visual configurations.

The modular concept gives you the freedom to experiment. Mix and match colors, switch the position of the face components, and come up with a configuration that is uniquely yours.

Beyond its looks, this clock is designed to fit naturally into your everyday spaces. It makes a great addition to:

- Your desk or home office.
- Your nightstand or bedside table.
- A dresser, bookshelf, or living room shelf.
- Any space that could use a little functional design!

FEATURES

- **Modular design:** Rearrange the individual face components to create different configurations.
- **Customizable colors:** Experiment with different filament colors to match your decor.
- **Personal touch:** Every assembly can have its own unique look.

PRINTING & ASSEMBLY

The clock is designed to be 3D printed in separate components and assembled.

Please note: The clock mechanism and hands are not included in the 3D-printed model and must be purchased separately. You will need a compatible quartz clock movement to complete the assembly.
