Summary

Sata Connector Cover Replacement

0.14 hrs	1 pcs	0.10 mm	0.25 mm	PLA	1 g	Prusa MK3/S/S+

Gadgets > Computers

Tags: repair connector sata

During the repair of a flat ribbon cable for a sata connector of a minipc, I noticed that the cover was broken in more than two pieces and I was missing at least one. So I designed the cover based on measurements. In the rare case that this may be useful to somebody, I'm publishing it here.

Printed in PLA with a 0.25mm nozzle on my MK3S. It's not that sturdy but I don't plan to remove it from the connector and it works. It is slightly thicker than the original to make it stronger.
