This is a remix of Clamikra his Suet Ball Holder. The Suet Ball holder itself is from Clamikra, The holder for the rods is from me.

This holder you can snap on the extended porch rods of the Birdfy Bamboo feeder. Just click it on and it wil sit steady on the rods. You wil need some hardware to fasten it. the Nut wil sit in the hole so you only need to tighten the bolt. The bolt may dig itself a bit in the PETG, you could use a fender washer or a normal M3 washer. Without it also works great

You could use the holder for other things to fasten on it.

Hardware: M3 nut and a M3 bolt thats around 20MM long. And if you want to a M3 Fender washer/M3 Washer
Print in PETG for strenght

This remix is based on
