SNAKE ENCLOSURE ACCESSORIES

Because if I can't have a snake, no one can I'm gonna give to the snake keeping community.

PRINT INSTRUCTIONS

1. Print your desired accessories using standard or better settings w/ supports (see notes for filament recs)
2. Clean print and allow to de-fume for at least a couple hours
3. Place in the enclosure, making sure that it is secure in the substrate
4. Congrats! Hopefully your snake will love this.

NOTES FROM THE CREATOR

- DO NOT USE PLA!!! IT WILL GET SOFT IN HEAT LAMPS!!!

- PETG or an outdoor-rated filament highly recommended
- Look I might not have a snake but I certainly want one.
- My dream snake is either a piebald ball python or a scaleless amel corn snake.
- I do plan on adding more hide sizes eventually... when I have the motivation, of course.
- PLEASE SEND PHOTOS OF YOUR SNAKES USING THIS IN MAKES I WOULD LOVE TO SEE THAT!!!!

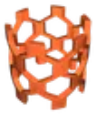

Not only obsessed with frogs,

Frog Dude (he/they)
