Summary

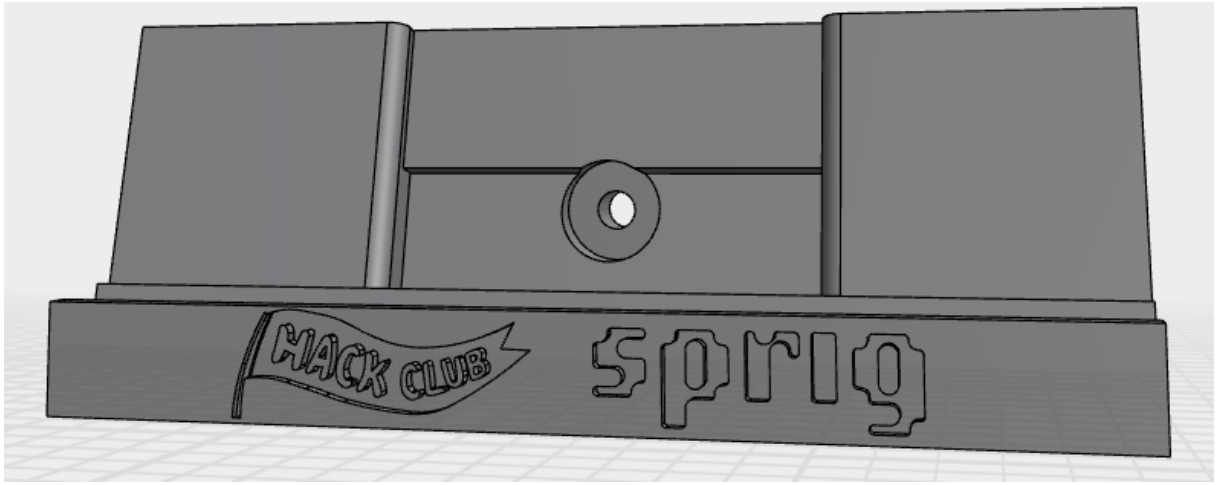

This is a model to made you able to store your sprig from sprig.hackclub.com better. And safer for the device.

Gadgets > Portable Devices

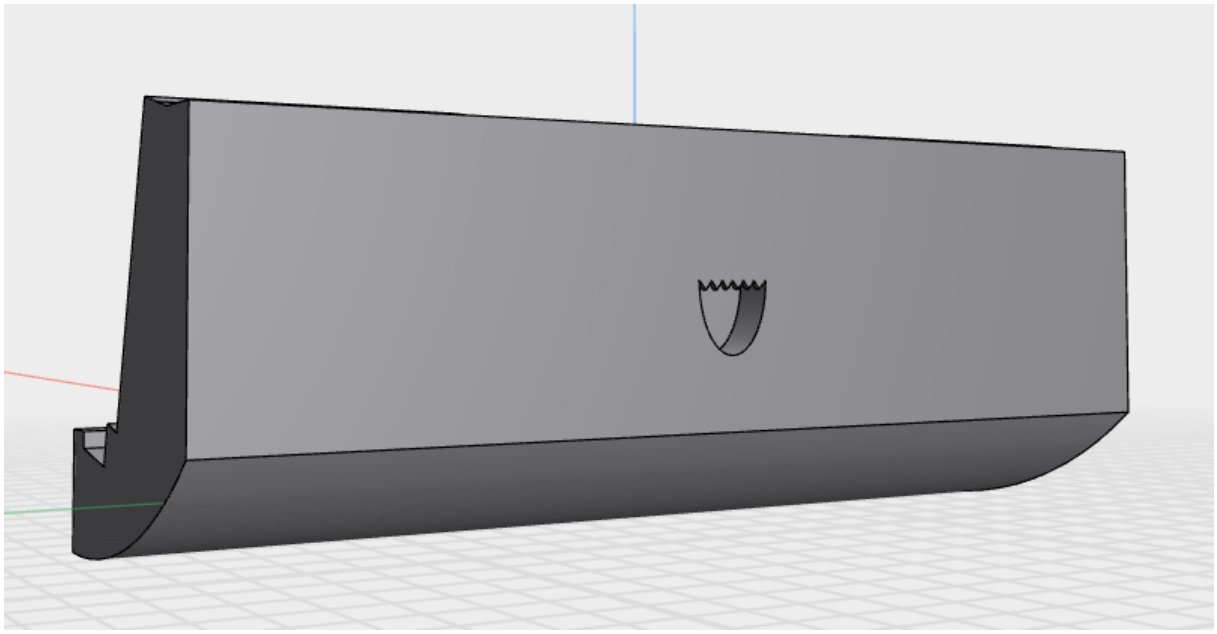

Tags: device sprig hackclub hackclubatlantis

This is a model made for atlantis.hackclub.com. The model is for a device made by hackclub.com. (The exact ysws program is: https://sprig.hackclub.com/) With this, you can store it on your wall. Its also safer for the device the rasberry pi pico because it will protect the circuits from physical damage.

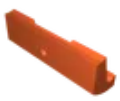

I made 2 versions of the holder. The first version can be secured to the wall with a m5 screw.

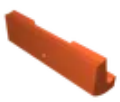

The second version can be hanged onto the wall with a nail. Just hammer a nail into the wall and hang the sprig holder onto it!
