100% dimensions are 130.4x196.4x129.4mm, print is currently untested and I am willing to take recommendations for the print scaling and modulation.

Credits to mothmansculthead for the model, I'm trying to fix up the back clip, this model's still a prototype.

Pro tip: Make yellow-tinted one-way glass to put on the eye socket :)

(for really ambitious people, attach a yellow LED to the top behind the glass)

To get more detail on it, it's recommended you paint this to get it fully right, and of course it's best in blue or red.
