Tags: headphones headset repair logitech g435

Replacement for broken phones headband.

Not scan from original, not 100% replica, just fits all other original parts. Feels also pretty much the same (IMO).

Replacent requires (almost) full disassembly of headset and some desoldering/soldering.

Wire is not fixed along the top side of band, so use tape. Anyway, it will be hidden under pad.

Obliviously PETG.
