Summary

Compact dog-bowl-style holder designed to organize the bone tokens from the Spots board game.

Toys & Games > Board Games

Tags: dog bowl boardgame spots

Keep the bone tokens from Spots organized in a bowl designed to look like a miniature dog dish. The model measures 52.5 x 52.5 x 23 mm and uses a wide, nearly vertical interior to make the most of the available space.

The tapered exterior, rounded upper edge and 1 mm raised bone emblem give the bowl a playful look that fits the theme of the game. The interior widens below the opening to approximately 46 mm, maximizing capacity without increasing the external footprint.

Print it as a simple one-color model on any printer, or use the optional two-color Bambu Studio profile for a contrasting lower accent. No supports are required.

Fits perfectly with the insert made by Liron Levy.

Included files:

- Universal one-color STL
- Separate body and accent-base STLs
- Bambu Lab A1 two-color AMS profile
- Bambu Lab A1 one-color no-AMS profile
- Bambu Lab A1 mini one-color no-AMS profile

Every Bambu Studio profile was test-sliced using fully resolved official machine, nozzle, process and filament presets.

This is an unofficial fan-made accessory. Spots and its associated names and artwork belong to their respective owners. No affiliation or endorsement is implied.
