Tags: chibi figurine owl imageto3d aigenerated sculptly

Chibi owl figurine with big round eyes and a feather-textured body, standing on a round base.

Made with Sculptly (https://sculptly3d.com): an AI image-to-3D generator. The model was generated from a single image, then rebuilt as one watertight body with a flat 1 mm base cut, scaled to 80 mm tall (about 47 x 48 x 80 mm). Mean surface deviation from the original generation: 0.77%.

Suggested print settings (I have not printed this one yet): PLA, 0.2 mm layers, 0.4 mm nozzle, 15% infill, 3 walls, no supports for the body, brim optional. The ear tips are thin, so slow the last layers down.
