Introducing Vase 008!!

It's neat! Print it!

Print it to flex your filament colors! You can easily print the two-tone color by splitting into parts. paint one part one color and the second part another color.

Printing Instructions:

- Layer height: Who care
- Supports: Nope

Special note: If printing the two-tone version, it's highly recommended that the fluted splines on the outside is not 100% filled in. Even if you don't choose 100% infill, other slicer settings might cause it to be filled in. Having it completely filled in might cause some external defects on it, especially if printing it in a silk filament.

Thank you for your time and consideration on this matter.

For those who have joined my club at the “Obsessor” tier or have subscribed to my commercial membership on Patreon, prints of this model can be used for commercial purposes.

Feel free to join my discord for additional support, questions, or suggestions!

Filaments used:

- Polymaker Silk Gold PLA
- Polymaker Gradient Celestial Blue-Purple PLA
- Polymaker Starlight Neptune PLA
