Spark your child's imagination with this fun and durable 3D-printable toy smartphone! Designed specifically for little hands, this pretend play phone features colorful, recognizable app icons that make role-playing extra exciting. It is the perfect screen-free alternative to keep toddlers and kids entertained while they mimic the grown-ups around them.

This model is completely optimized for a smooth 3D printing experience. It prints flat on the build plate and is entirely support-free. The design is highly recommended for multi-color printing (perfect for AMS/MMU systems) to really make those beautiful app icons pop! It is a quick, easy, and satisfying print that is ready for playtime right off the printer bed.

I would absolutely love to see your creations! Please feel free to share a photo of your make if you enjoyed this design. Happy making!
